

## A walk in the park Rulebook

### **Rules**

- 1) Each player must have a way up and the start or finish to zipline in their hand at all times
- 2) The map must have four centre tiles that would consist of one home base and three paths
- 3) The user must have one builder and three guests and the builders can walk anywhere but the guests must stick to paths and the rope course
- 4) Guests can queue for the rope courses and they can queue on rope courses if there is space.
- 5) The tiles must be played in a legal way to make sure that they connect to the path.

### Setup

- Deal each player 1 starter ladder tile and 1 starter zip-line landing tile
- Shuffle the remaining tiles and deal each player 1 further tile
- Place the starter tiles (hut, 2 up ladders and a 4 way path) in the middle of the play area
- Place the tiles in a stack within easy reach

### **Turn Order**

- Draw a tile from the face-down stack
- Place 1 tile in any legal way (so at least one edge matches a tile in play)
  - If you placed a high-ropes tile, place an instructor meeple on it
  - If you placed a path tile, place no meeple on it
- Move your meeples in play to a valid space
  - Meeples on waiting spaces can move up the ladder to the tree
  - Meeples on high ropes tiles may move across the next course piece towards a zipline
  - Meeples who ride a zip-line to the end end may either
    - Return by a path to the hut
    - Return to the owner's hand
  - You may place one available meeple not in play on the hut tile

### **Scoring Rules**

- 1) The guest will score a point each time they go across a new section of rope course (e.g; Way up +1 , Jump Steps +1, Start of zip +1, End of zip +1)

### End Game

- The game ends when the last tile has been played and meeples have been moved
- Highest score wins
